Special Issue: Workshop on "Geometric and combinatorial methods in the Hermitian sum spectral problem", University of Coimbra, Portugal, 15–16 July 1999

E. Marques de Sá, J.F. Queiró and A.P. Santana
Workshop on "Geometric and combinatorial methods in the Hermitian sum spectral problem", University of Coimbra, Portugal, 15–16 July 1999 1

S. Friedland
Finite and infinite dimensional generalizations of Klyachko's theorem 3

W. Fulton
Eigenvalues of majorized Hermitian matrices and Littlewood–Richardson coefficients 23

A.A. Klyachko
Random walks on symmetric spaces and inequalities for matrix spectra 37

A. Knutson
The symplectic and algebraic geometry of Horn's problem. 61

Regular papers

L.M. DeAlba and L. Hogben
Completions of P-matrix patterns 83

F. Baur and W.J. Ricker
The Weyl calculus and a Cayley–Hamilton theorem for pairs of selfadjoint matrices. 103

K. Gustafson
An extended operator trigonometry 117

T. Huang, W. Li and W. Sun
Estimates for bounds of some numerical characters of matrices 137

Table of Contents continues

M.E. Valcher
Nonnegative linear systems in the behavioral approach: the autonomous case 147

M. Campanella and G. Garbo
The structure of the state representation of shift invariant controllable and observable group codes 163

J.R. Winkler
A resultant matrix for scaled Bernstein polynomials 179

D. Bondyfalat, B. Mourrain and V.Y. Pan
Computation of a specified root of a polynomial system of equations using eigenvectors. 193

Author index to volume 319 211
